

thirty-six rotational viewing sequences (or three arcs dividing a circle)

camera

Robert Blatt

thirty-six rotational viewing sequences (or three arcs dividing a circle)
camera

A collection of thirty-six scores for taking photographs notating the orientation of the camera for each individual photograph using Euler angles as X, Y, and Z coordinates ranging from -1 to +1, calculated with an accelerometer or otherwise. Each score results in a series of thirty-six photographs and can be realized in different environments, times of day, situations, etc., but in all cases the photographer remains fixed in one location when realizing any one score.

Robert Blatt, 2018
